

Dedicated Servers

Written by Administrator

Tuesday, 07 July 2009 23:27 - Last Updated Friday, 23 September 2011 19:35

Green Olive Tree offers a full range of dedicated servers to meet your every need. We have the latest hardware and software

available including Hex-core Xeons, Cisco firewalls, Linux, Windows and a vast array of control panels if you so choose.

We can also help your start up with more complex configurations including load balancing, dedicated database and application server arrays and even the latest in virtualization technology.

Head on over to the order page to get started, or [give us a call](#) !
